

# Update

## Hone your skills on this craft!

Shortly you will be able to hone your fishing prowess on 12.48m *Big Cat*. She is presently getting her final touches; electrics, interior fit-out and anti-foul.

Since *Big Cat* designed by *Nekton International* has been crafted by the best and is in Survey we can highly recommend an eventful, safe and rewarding trip where even non anglers can go along for just the ride.

There are numerous fishing rod holders, an easy walk around deck, excellent view from the flybridge, generous freezer space, ample galley, reliable *Cummins* engines, a fast trip back and a knowledgeable crew who will assure your comfort and catch.

Contact Jim on 0433 430 248 or [bigcat@bigcat.com.au](mailto:bigcat@bigcat.com.au) to book a great day for yourself, your family, your friends or for a different Christmas Party for your workplace.

## New people on the block

Our team is growing. We extend a warm welcome to Linda, Luke, Josh, Peter, Sam and Shaun who fill positions of marketing, certified welder, fibre-glasser, janitor/roustabout, roustabout and electrician.

## In another corner we have...

Nestled in another part of our shed we have another vessel taking shape.

This is the 6.6m *Air Rider* designed by *Global Marine Design*. To date it has amazed onlookers for its unique hull design.

Because of the inherent intricacies particular attention has been made in its construction.

Commendation must be made to the certified welder assigned to her construction.

## We're in for some Reel Action

We, with *Nekton International* have just begun the design cycle for 14.5m high end luxury game fishing high speed catamaran, *Reel Action* using the latest compliant *Volvo IPS* drive system.

This vessel will be completed by mid 2010. Watch out for more details in our next newsletter.

## What a hot bimini!

This aluminium bimini has added to this well loved vessel.

## wy aluminum | masters

As noted in earlier newsletters because we are accomplished custom aluminium fabricators we have been providing our services to areas outside the marine industry. At present we are fabricating specialised tool boxes to suit trailers, caravans and specialist vehicles, security screens and more.
